Edward Jenner

Louis Pasteur

the bones that **make up the human body**

the place where **two bones come together**

muscles **move the different parts of our body** by contracting and relaxing

the process where **the food we eat gets broken down**

vehicles that **carry oxygen** around the body

a **tube that blood cells travel through** around the body from the heart

a **tube that carries blood cells back** to the heart

tiny living things that **cause illness**

a scientist who **invented a vaccination against smallpox**

a scientist who discovered that **heating liquids killed the germs** within

ways to keep healthy

reason

exercise

exercise keeps our muscles and bones strong, it also makes us feel happy

eating healthy foods

our bodies take nutrients from our food that help us to grow and stay well

resting

rest helps our bodies to recover and rebuild

keeping clean

good hygiene prevents germs from spreading

medicines

if we are ill, sometimes medicines can make us better
